PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate with hands-on experience in AWS cloud computing, infrastructure, and networking gained through independent cloud projects. Skilled in deploying and securing AWS environments using EC2, S3, IAM, VPC, RDS, and Lambda, with working knowledge of automation, monitoring, and cost optimization. Strong Python programming and Linux fundamentals, with practical exposure to cloud security through governance and auditing projects. Seeking an AWS Cloud Intern / Junior Cloud Engineer role to apply and build on these skills.

TECHNICAL SKILLS

AWS Services: EC2, S3, IAM, VPC, RDS, Lambda, CloudWatch, EFS, SNS, SQS, EventBridge, API Gateway, DynamoDB, Route 53, Application Load Balancer (ALB), Amazon Bedrock

Networking: Subnets, Route Tables, Internet Gateway, NAT Gateway, Security Groups, Load Balancing

Programming & Databases: Python, Flask, MySQL

Operating Systems & Tools: Linux, Windows, Git, GitHub, Nginx

Cloud Operations: Monitoring, Cloud Security, Automation, Cost Optimization

AWS PROJECTS

CloudGuardian – AWS Cloud Governance Platform

- Built a cloud governance platform for automated security auditing, monitoring, and cost optimization.
- Developed serverless backend logic using AWS Lambda, API Gateway, and DynamoDB, with event-driven automation via EventBridge and CloudWatch for continuous monitoring.
- Used Amazon S3 and IAM for secure data storage and access control, with Amazon Bedrock for AI-assisted analysis.

Three-Tier E-Commerce Application on AWS

- Architected and deployed a secure three-tier architecture using EC2, Application Load Balancer, and VPC.
- Configured NAT Gateway, Route 53, and security groups for traffic routing and network security.
- Set up Amazon RDS (MySQL) as the backend database, with Nginx as reverse proxy and Flask as the application layer.

Cost Optimization Automation

- Automated EC2 and RDS start-stop scheduling using AWS Lambda and EventBridge Scheduler.
- Reduced unnecessary cloud spend by eliminating idle compute and database runtime.

CERTIFICATIONS

- Front-End Web Development & Cloud Fundamentals (TNSDC) – IBM SkillBuild
- MongoDB Basics for Students – MongoDB University (2025)
- Object-Oriented Programming using Python – Infosys Springboard (2024)
- Certificate in Artificial Intelligence (Beginner) – C-DAC / Alpha Training & Consultancy Services (2024)
- Python Programming Certification – Apollo Computer Education

EDUCATION

B.Sc. Computer Science – Alpha Arts and Science College, Chennai

Class XII (CBSE) – La Chatelaine Junior College, Chennai – 60.8% | Class X (CBSE) – La Chatelaine Junior College, Chennai – 66.2%

LANGUAGES

English, Tamil, Telugu
