PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner and B.Sc. Computer Science graduate with hands-on experience in AWS DevOps and cloud infrastructure projects. Skilled in CI/CD (Jenkins, Maven, SonarQube, Docker), Kubernetes on Amazon EKS with Helm, Infrastructure as Code (Terraform, CloudFormation), Ansible and Linux automation, monitoring (CloudWatch, Prometheus, Grafana), and cloud security automation. Seeking an AWS DevOps Engineer Intern / Junior DevOps Engineer role.

TECHNICAL SKILLS

AWS Services: EC2, S3, EBS, VPC, IAM, RDS, Lambda, EKS, ECR, ALB, Route 53, CloudWatch, CloudTrail, CloudFormation, EventBridge, SNS, Systems Manager, API Gateway, DynamoDB

DevOps & IaC: Jenkins, Maven, SonarQube, Docker, Kubernetes, Helm, Terraform, Ansible

Networking: Subnets, Route Tables, Internet Gateway, NAT Gateway, Security Groups, NACLs

Monitoring & Ops: CloudWatch, Prometheus, Grafana, Security, Automation, Cost Optimization

Programming & OS: Python, Boto3, Bash, YAML, Linux, Windows, Git, GitHub, Nginx

AWS PROJECTS

CloudNative Application Delivery Platform on AWS

- Built a CI/CD platform using GitHub, Jenkins, Maven, SonarQube, Docker, and Amazon ECR for automated build, testing, code quality, and image delivery.
- Deployed containerized applications on Amazon EKS using Kubernetes and Helm, with ALB and Amazon RDS for application access and database connectivity.
- Provisioned AWS infrastructure using Terraform and implemented CloudWatch, Prometheus, and Grafana monitoring with deployment verification and Helm rollback.

AWS Infrastructure Reliability & Operations Platform

- Provisioned AWS infrastructure using Terraform and CloudFormation, including VPC, EC2, IAM, S3, RDS, and Application Load Balancer resources.
- Automated Linux configuration and operational tasks using Ansible, Bash, and AWS Systems Manager for secure remote management and administration.
- Implemented CloudWatch monitoring and EventBridge automation with Lambda and SNS for operational alerting, scheduled tasks, and cloud cost optimization.

CloudGuardian – AWS Cloud Security & Governance Platform

- Built a serverless AWS security platform using Python, Boto3, Lambda, API Gateway, DynamoDB, and Terraform to audit IAM, S3, and EC2 resources.
- Automated scheduled security scans using EventBridge Scheduler, storing findings and JSON security reports in DynamoDB and S3 with SNS security alerts.
- Implemented CloudWatch monitoring and CloudTrail auditing to provide centralized visibility into security findings, Lambda activity, and AWS API events.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) – Amazon Web Services (2026)
- AWS DevOps Engineer Certificate – FITA Academy (2026)
- Front-End Web Development & Cloud Fundamentals (TNSDC) – IBM SkillBuild
- MongoDB Basics for Students – MongoDB University (2025)
- Object-Oriented Programming using Python – Infosys Springboard (2024)
- Certificate in Artificial Intelligence (Beginner) – C-DAC / Alpha Training & Consultancy Services (2024)
- Python Programming Certification – Apollo Computer Education

EDUCATION

- B.Sc. Computer Science – Alpha Arts and Science College, Chennai – 70.18%
- Class XII (CBSE) – La Chatelaine Junior College, Chennai – 60.8%
- Class X (CBSE) – La Chatelaine Junior College, Chennai – 66.2%

LANGUAGES

English, Tamil, Telugu
